

Lighting 101 for Auto Dealers

ENERGY STAR®

Free WebEx Training

Attend a free WebEx training session on Lighting 101 for Auto Dealers and start saving on your energy costs now.

Changes in lighting can be one of the first steps your dealership takes to becoming more energy efficient. Today, advances in more energy-efficient lighting are growing rapidly. Choices can include Exit signs with light emitting diodes (LEDs), compact fluorescent lighting (CFLs), or changing out lighting fixtures for more efficient choices. That's just to name a few.

What You'll Learn

Lighting 101 for Auto Dealers from ENERGY STAR® Small Business is a free one-hour training session that introduces the basics to help get you started by covering questions such as:

- What are the best lighting options for your situation;
- What are the approximate costs;
- Where can you go for more answers;
- What kind of savings can you anticipate; and
- What are the newest advances.

How to Participate

Get the answers you need and learn about the options you have available. The session is scheduled for June 26 at 11:30 a.m. Eastern Daylight Time (EDT). Go the ENERGY STAR WebEx Training Page, <https://energystar.webex.com/energystar> and look for Lighting 101 for NADA to register (the password is "showroom".)
